

Animal Care & Control Team *of Philadelphia*

The Canine Foster Care Program is one of the many life saving arms of the Animal Care and Control Team of Philadelphia. The primary reason for foster care is to provide a temporary home for a potentially adoptable animal whose current condition is not manageable in a shelter setting, or to relieve overcrowding in the shelter. Although previous fostering experience is not required, ideal foster care provider will have basic knowledge of animal care and training and be committed to finding their foster animal a safe and loving "forever home". As a foster care provider, you will provide the animals with care including, food, water, shelter, training, grooming and medical treatment when necessary.

Fostering a shelter animal is a wonderful and rewarding experience but can also be time consuming and hard work. Please seriously consider all of the aspects of the foster care program before deciding to apply to foster. **All first-time foster care providers must complete the following application.**
